

Maintenance Manager

Wisconsin Tubing, LLC, a manufacturer and wholesale distributor of water drainage products, is looking for a reliable Maintenance Manager to oversee all installation, repair and upkeep operations of the company's production lines, facilities and vehicles. You will be the one to ensure your colleagues have the best physical resources to complete their duties on time and according to budget.

Responsibilities will include:

- Develop maintenance procedures and ensure compliance
- Carry out inspections of facilities to proactively identify and resolve issues
- Manage an annual maintenance budget
- Keep maintenance logs and report on daily activities
- Support production activities with equipment start up and shut down
- Comply with health and safety policies

Equipment you can expect to work with:

- Extrusion lines
- Corrugators
- Perforators
- Forklifts
- Vacuum pumps
- Lights
- Semi tractors and trailers
- Trucks, dump truck and front end loader

The goal is to ensure the company facilities are well-cared for and adequate to support the company's business operations.
